INTRODUCTION

Results-driven Software Developer with strong foundation in Python, Data Structures and Algorithms, and Full-Stack Development. Demonstrated expertise in building scalable, high-performance applications with emphasis on clean, testable code and system optimization. Skilled in solving complex problems through efficient algorithms and database optimization. Passionate about writing maintainable code and designing robust backend solutions that handle high-volume, low-latency requirements with focus on performance and code quality.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js
Backend: Python, Express.js, Node.js, REST API
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, AWS EC2/S3, VSCode
Soft Skills: Complex problem-solving, Code quality focus, Team collaboration

CERTIFICATIONS

Oracle Cloud Infrastructure 2023 Certified Foundations Associate
Introduction to Machine Learning - NPTEL
Prompt Engineering for ChatGPT - Great Learning
Introduction To Databases - NxtWave

EDUCATION

Sathyabama Institute Of Science And Technology <i>B.E Computer Science and Engineering</i>	September 2022 - March 2026 <i>GPA: 8.17/10.00</i>
Vignan Co-operative Junior College <i>BIEAP, Class 12th</i>	July 2020 - April 2022 <i>Percentage: 94.5%</i>
Sir C V Raman Public School <i>SSC, Class 10th</i>	June 2019 - May 2020 <i>Percentage: 96.8%</i>

PROJECTS

AI Cancer Prediction System

Machine Learning, TypeScript *Jun 2025 – Present*

- An AI-powered web application that predicts the risk of cancer using machine learning algorithms based on user health inputs.
- It provides personalized medication and diet plans, locates nearby hospitals using geolocation, and allows users to book doctor appointments — offering an end-to-end support system for cancer awareness and care.

Project Cost Tracker

React.js, Firebase *Jan 2025 – Mar 2025*

- A responsive web application designed to monitor and manage project expenses efficiently.
- Built with React.js and powered by Firebase for backend services including real-time database and authentication.
- Users can add, categorize, and track expenses, with live updates and summary views to support better financial oversight.

AI Resume Analyzer

React.js, Node.js, Express.js, PostgreSQL, Google Gemini AI *Apr 2025 – May 2025*

- An AI-powered resume analysis platform that evaluates job seekers' resumes using Google Gemini AI.
- Provides comprehensive career insights, skill assessment, experience evaluation, and personalized improvement recommendations for enhanced job market competitiveness.

EXPERIENCE

CodeAlpha

Sep 2025

Full Stack Development Internship

Remote

- * Developed high-volume, low-latency eCommerce application using Node.js, React.js, implementing efficient database queries and optimized API endpoints
- * Designed and implemented Admin Panel with complex filtering, sorting, and pagination logic

ACHIEVEMENTS

- Hosted Startup Bazar event at Sathyabama University, curating a platform for startup founders to present and discuss business ideas with peers and potential collaborators.
- Solved 100+ algorithmic problems across LeetCode and HackerRank.
- Participated in the MCP Mega Workshop conducted by NxtWave.
